

# Special Needs Dating

A dating website made easy for those with special  
needs

# Timeline

8/26 - 8/28 have working api

8/30 - 8/31 finish redux labs/start mvp

9/1 - 9/2 have MVP ready, I want to atleast have users seeded and have them be able to match (by both hitting like)

9/2 - 9/3 create signup and authentication (may need to touch up on auth)

9/2 - 9/5 learn action cable (for chat) and active storage (for pictures)

9/7-9/9 polish app

# Market Research

Being a sensitive subject, my special needs dating app took some considerations.

I have interviewed the following people:

- A person (and his mother) with mild to moderate autism who lives on his own
- A mother of an adult with severe autism who needs to help him make most decisions
- A person who inspired this idea, whose brother has moderate autism and the lack of finding dates distresses him.
- The previously mentioned person's mother
- A special education teacher
